

Update!

CROSS Towards a circular, sustainable BOUNDING & vital built environment ARIES

Newsletter | Edition 6 | March 2021

With this newsletter we would like to inform you about the progress of the **Crossing Boundaries 2021 conference** which will be held from 24-25 March 2021.

Register now!

Only a few weeks left until the Crossing Boundaries conference, make sure you are part of this digital conference and register now!

Please use the following [link](#) to register for the conference.

Confirmed plenary speaker

Aristide is a senior researcher at the Ecole Polytechnique Fédérale de Lausanne (EPFL) and the non-profit organisation Metabolism of Cities. From 2018 to 2020 he was Chair of Circular Economy and Urban Metabolism at the Université Libre de Bruxelles where he attempted to build bridges between the academia, public administrations and “circular” actors in order to accelerate Brussels’ transition towards a more circular economy and metabolism.

During the last years, he has collaborated and worked with/for several universities, research centres, environmental administrations, NGOs, youth organisations and consultancy firms on a great variety of projects trying to reduce the environmental footprint of territories. Finally, Aristide is the co-founder of Metabolism of Cities, a global network of people working together on systemically reducing net environmental impacts of cities and territories in a socially just manner and context-specific way (www.metabolismofcities.org).

The project Super Circular Estate joins the digital Crossing Boundaries 2021!

During the Crossing Boundaries 2021 conference, the closing conference of the UIA-project Super Circular Estate will also take place digitally.

On Wednesday 24 March 2021 you can learn more about developing a circular estate based on the best practises in the first circular housing estate. The Super Circular Estate project partners are looking forward to share their knowledge, experiences and lessons.

The Super Circular Estate program consists of several components. In the plenary part you can hear everything about the entire Super Circular Estate project through an overall presentation about the circular area development. After a short break, several project partners will discuss the experiences within the project.

Subsequently, there will be various sub-sessions in which you will learn more about:

- The experimental circular construction and demolition techniques
- The closed water cycle in the area
- How is dealt with social values within such a restructuring
- How the residents and neighbours are involved
- How public space can be (re)organized in a circular manner
- Which studies have been conducted
- How education is involved in this circular project
- What the lessons are that we have learned to use the knowledge

- Expertise gained in new area developments to upscale to realise.

To see the entire project with your own eyes, you can use the Super Circular Estate Virtual Tour all the time! With this virtual tour you can walk through the project area yourself, see all developments and find extra information about the specific parts of this innovative circular project.

Can't wait? There is more information on www.superlocal.eu/sce-en/

More information can be found on the conference website: www.crossingboundaries2021.nl or by email to info@crossingboundaries2021.nl.

This conference is part of the SBE Conference Series about which more information can be found at: <http://www.sbe-series.org/>
