“Through my association with the CIB since 1994, I have developed the very best relationships with those I have collaborated and worked with over the years.”

Find out how membership can benefit you!

Collaborating for Innovation in the Built Environment

The International Council for Research and Innovation in Building and Construction (Conseil International du Bâtiment) is the worldwide network of building and construction experts who improve their performance through international cooperation and information exchange with their peers to improve the quality and impact of research and innovation activities in the sector. CIB was established in 1953 with United Nations’ assistance and holds special UN consultative status.

Commissions

These are the core of our work. A CIB Commission is a worldwide network of experts in a defined scientific area who meet regularly and who collaborate in international projects and exchange information on a voluntary basis. A Commission can be a Task Group (TG) with a limited lifetime, scope and objectives, or a Working Commission (W) with a longer-term ‘permanent’ status and a broader programme, scope and objectives.

CIB TASK GROUPS

TG81 – Global Construction Data
TG88 – Smart Cities
TG91 – Infrastructure
TG96 – Accelerating Innovation in Construction
TG97 – Nature-Based Solutions for Climate Resilient Buildings and Communities

CIB WORKING COMMISSIONS

W014 – Fire Safety
W023 – Wall Structures
W040 – Heat and Moisture transfer in Buildings
